**ENGLISH – Seat subframe**

The SPARCO subframe for Renault Clio I (1990→1998) is suitable to use original slides. The adaptors must be fitted on original slides and then, on the slides, the seat.

In the picture below is shown the driver seat fitting; for co-driver seat the position of subframe must be rotated 180° and holes not used in the picture should be used.

Two holes with “R” letter must be used for driver and co-driver position. For PRO2000 seat, please use two spacers between the adaptor and the seat to take the seat 3 cm up.
